

AmeriCorps Service Member Position with TerraCorps & Opacum Land Trust

TerraCorps cultivates an ecosystem of people and organizations that center community land ownership, access, and stewardship to support a diversity of interests that benefit human health and environmental sustainability. We value the power of local nonprofits to best understand and serve their communities. Our goal is to help them succeed by providing them access to the AmeriCorps national service model to build organizational capacity.

TerraCorps partners with a network of 40+ nonprofits in Massachusetts and Rhode Island focused on community needs related to local land conservation and sustainable agriculture. These partners act as service sites for a new cohort of up to 60 AmeriCorps service members annually. Service members are paired with a site supervisor who provides guidance and mentorship while they learn to manage community programs and projects over an 11-month, 1,700-hour service term.

Opacum Land Trust is interviewing candidates for a Land Stewardship Coordinator (LSC). The LSC will engage with the Executive Director to manage volunteers on community service projects, educate or train individuals in environmental stewardship or environmentally conscious practices, and complete three capacity building projects. Potential projects include:

- Set up Landscape software to track stewardship needs on Opacum properties and establish property monitoring protocols.
- Coordinate educational walks on our properties about environmental stewardship, or educational activities on environmentally conscious practices.
- Set up a volunteer stewardship program to assist with property monitoring including coordinating property workdays for trail improvements, habitat management, and maintenance.

Applications for this position must be submitted via the TerraCorps online application. The position description for the LSC at Opacum Land Trust can be found at [TerraCorps Available Member Positions](#).
